A note on the Caltrans award process:

We have several major milestones we process when preparing a project for award.

- Bid opening: This is the event that triggers the award process. Once a bid has opened, we immediately begin looking at the results to process the contract award.
- Award recommendation: The district responsible for designing the project will take a look at all the bids submitted and determine whether or not it is in the department's best interest to award the contract, by taking a look at the item prices submitted and the working schedule, if necessary. This can involve calls to the bidders to determine if there were any problems with bids or the contract itself.
- Civil rights evaluation: Our Office of Business and Economic Opportunity reviews the UDBE or DVBE submittals on all projects to determine if the project goals have been achieved, or if a good faith effort has been obtained.
- Funding certification: Once we have determined a low bidder, we begin an analysis that determines how much of the allocated funding will need to be used to award the contract, and in the case of projects where funding has multiple fund sources, we determine what portion of each allocation will go toward paying for construction.

Once all milestones have been achieved for the bidder we are processing the award for, the contract will be ready to award. We will proceed with the contract award and contract approval. In the event that there is a re-ranking of bidders, both the funding certification and civil rights evaluation will need to be re-processed for the new bidder.
